Technology Solutions Specifically Designed for Banks and Credit Unions.

DeposZip is an example of how a company with a deep understanding of technology can yield powerful market-changing solutions. Financial institutions put their trust in Vertifi to deliver the best, most pragmatic software solutions available today. And Vertifi earns that trust by consistently delivering software solutions that exceed their expectations.

Other Vertifi solutions include:

Branch Capture

Our remote branch capture program enables banks and credit unions to capture transit checks electronically and transmit image cash letters (ICLs) from their branch locations. Branch Capture takes advantage of the potential offered by the Check Clearing for the 21st Century Act (Check 21) and provides many other benefits.

Image Cash Letter (ICL) Services

Whether you are capturing checks and generating ICL files using Branch Capture, an alternative branch capture solution, ATMs or kiosks, you can use Vertifi's ICL services to quickly and conveniently collect your checks.

Make deposits from anywhere™

Now your online and mobile branches can do pretty much everything a physical branch can do – including take check deposits.

Welcome to DeposZip®

When you add DeposZip® remote deposit capture to your online or mobile banking solution, you empower your customers to do all their banking from the comfort and convenience of their home or office. Using everyday desktop scanners, or a supported smartphone*, customers simply capture and submit checks, and your staff approves and processes them.

DeposZip Benefits

DeposZip expands your customer reach and protects your existing relationships by improving customer satisfaction and convenience. Your customers will love not having to worry about business hours and branch locations — especially your business accounts whose demands for convenience

and expanded service hours are among the greatest of all.

DeposZip not only works anytime, it works anywhere. As valued customers move from your area, you can continue to serve their needs and retain the relationships. In fact, DeposZip expands the adoption of your other online services as more customers spend more time online with you.

Capture Checks from Any Scanner or Supported Smartphone

DeposZip works with a variety of smartphones*, as well as all commercially-available scanners, including specialty scanners for use with high-volume business accounts. And because DeposZip is a hosted solution, there is

no lengthy IT deployment or expensive hardware costs.

Easy to Use, Easy to Manage

DeposZip is designed to be easy to use. The system requires minimal training and provides maximum convenience.

DeposZip uses advanced image capture functionality, image quality, and intelligent amount recognition technology to capture, validate, balance, and manage deposit transactions from the moment they are received from your customer, until they are posted to your host system.

* DeposZip Mobile presently supports iPhones and Android phones running version 1.6 or greater.
